## Patient and Significant Others Health Survey<sup>®</sup>

You're taking this proactive survey because you want better health...but what about your significant others? Spouses, children, boyfriends, girlfriends and anyone with whom you share hugs, kisses and intimacy are all interconnected to your wellness...and their own! Symptoms might be more prevalent in one person than the other—only laboratory tests will reveal the truth of what is going on in each of our bodies. Remember...the sooner an imbalance is detected, the easier it is to correct—before symptoms manifest. Celebrate strong mind and body health together with your significant others...every day. Each of your significant others should fill out their own copy. The tests are easily done in your own home with clear, concise instructions and mailer. Your practitioner will give you an individual interpretation of your test(s) with the purpose of identifying the root cause(s) of your health issues.

(BioHealth Diagnostic's laboratory test numbers are listed, see page 4 for other suggested labs when necessary)
